

Adobe — 30 DSA Interview Practice Questions

Targeted practice set for software-engineering interview preparation. Problems are LeetCode-style and can be practiced on LeetCode, GeeksforGeeks, HackerRank, CodeSignal, CodeChef or equivalent platforms. This is a preparation list based on public interview patterns; it is not a claim that these exact questions will be asked.

A public Adobe interview report includes Two Sum, Valid Parentheses, Sort Colors and recursion/permutation work.

#	Problem	Topic	Difficulty	Platform
1	Best Time to Buy and Sell Stock	Array	Easy	LeetCode-style
2	Climbing Stairs	DP	Easy	LeetCode-style
3	Linked List Cycle	Linked List	Easy	LeetCode-style
4	Merge Two Sorted Lists	Linked List	Easy	LeetCode-style
5	Reverse Linked List	Linked List	Easy	LeetCode-style
6	Two Sum	Array/Hashing	Easy	LeetCode-style
7	Valid Parentheses	Stack	Easy	LeetCode-style
8	0/1 Knapsack	DP	Medium	LeetCode-style
9	Add Two Numbers	Linked List	Medium	LeetCode-style
10	Binary Tree Level Order Traversal	Tree/BFS	Medium	LeetCode-style
11	Cheapest Flights Within K Stops	Graph/DP	Medium	LeetCode-style
12	Coin Change	DP	Medium	LeetCode-style
13	Combination Sum	Backtracking	Medium	LeetCode-style
14	Copy List with Random Pointer	Linked List	Medium	LeetCode-style
15	Daily Temperatures	Monotonic Stack	Medium	LeetCode-style
16	Decode Ways	DP	Medium	LeetCode-style
17	House Robber	DP	Medium	LeetCode-style
18	Longest Common Subsequence	DP	Medium	LeetCode-style
19	Longest Increasing Subsequence	DP	Medium	LeetCode-style
20	Lowest Common Ancestor of a Binary Tree	Tree	Medium	LeetCode-style
21	Maximal Square	DP/Matrix	Medium	LeetCode-style
22	Maximum Subarray	Array/Kadane	Medium	LeetCode-style
23	Permutations	Backtracking	Medium	LeetCode-style
24	Product of Array Except Self	Array	Medium	LeetCode-style
25	Subsets	Backtracking	Medium	LeetCode-style
26	Word Break	DP	Medium	LeetCode-style
27	Binary Tree Maximum Path Sum	Tree/DFS	Hard	LeetCode-style
28	Edit Distance	DP	Hard	LeetCode-style
29	Merge K Sorted Lists	Heap/Linked List	Hard	LeetCode-style
30	Serialize and Deserialize Binary Tree	Tree/Design	Hard	LeetCode-style

Interview practice rule: For each problem, first explain brute force, then optimize it. Always state time complexity, space complexity, assumptions and edge cases. After solving, practice one variation of the same pattern.
