PROJECTS

AI Interview Preparation System | *React.js, Python, FastAPI, MongoDB, RAG, LangChain*

2026

- Built a scalable AI Interview Preparation System with a modular FastAPI backend, MongoDB, and Docker, exposing RESTful APIs consumed by a React.js frontend.
- Implemented secure authentication (JWT, password hashing, OTP-based email verification via SMTP) and AI-powered features: LLM-generated interview questions (Google Gemini API), ATS resume analysis, and coding practice modules.

Hostel Information Assistant | *Python, LangChain, Gemini API, FAISS, Hugging Face, FastAPI, MongoDB*

2026

- Built a RAG-based assistant using LangChain, Hugging Face embeddings, and a FAISS vector store to deliver accurate, context-aware answers from hostel documents.
- Implemented document ingestion, text chunking, embedding generation, and semantic search, integrated with the Google Gemini API via a FastAPI backend and MongoDB.

E-Commerce Website | *HTML5, CSS3, JavaScript, Bootstrap*

2025

- Built a responsive e-commerce frontend with product listings, search, an image slider, shopping cart, navigation bar, and category sections.
- Designed an interactive UI with responsive layouts, hover effects, dynamic product cards, and JavaScript-based DOM manipulation.
